

## LONI - Stone Wall Sconce

### Description

Organic in shape and grounded in nature, the LONI wall sconce brings a sense of raw beauty to any space. Carved from natural travertine, each piece features an imperfect puddle-like silhouette that feels both effortless and intentional. At the heart of the design, a central bulb nestles into the stone, casting a soft glow that highlights the earthy textures and natural tones of the material.

Inspired by organic forms and understated elegance, LONI is a sculptural statement, perfect for adding warmth, depth, and quiet character.
