

LUMA - Travertine Wall Sconce

Description

The LUMA LED wall light seamlessly blends cutting-edge lighting technology with a sleek, natural design, making it an ideal choice for modern interiors. With its circular backlit profile in elegant travertine, it offers a sophisticated yet timeless look while ensuring superior performance. Featuring a warm light colour temperature of 3000K (warm white). Designed with precision, the light measures 230mm x 230mm, offering a compact form factor that doesn't compromise on brightness.

Its backplate ensures secure surface mounting, providing both stability and easy installation. Operating at 85-265V with a 10W power consumption, it offers energy-efficient lighting that reduces electricity usage while maintaining a high level of brightness. The built-in LED chips are engineered for long-lasting durability, reducing the need for frequent maintenance and ensuring consistent performance. The backlit feature casts a soft yet even glow, creating a beautiful wash of light that complements any space.

With its travertine finish, it adds a touch of natural elegance to both residential and commercial settings. Its high-performance features and minimalist design make it a top choice for those seeking a stylish and energy-efficient lighting solution. Combining form and function, this light is a versatile and sophisticated addition to any interior space.
